**Ministry Category:** Industry personnel (CDK global Pvt Ltd)

**Problem Statement:** Common CSR portal     **Problem Code:** VM1

**Team Leader Name:** Alok Tiwari     **College Code:** 1-3511897603

## Idea Solution:

our data consist of both web and mobile application (android).

mobile app is a subset of website (i.e. website contains all the features of mobile app and some additional features).our project is versatile , reliable and uses both iterative and digital methods.

## Creators/joiners

**Admin:** it can handle both web and app for which it has the power to create event and also has the power to which company should registered in the event.

**Individual:** One can create or join the event as a individual and participate in the social service one can join as a event participator or create event for which he/she help for the people who need them.

**Group:** a group of people come together and join or create a social event as a participator or as a creator of event.

**Company:** Private sector company with its resource and human power can create event also join in any event whatever they want and socialize the event with more effectiveness and can help or serve the nation people better.

**Technology Stack:**
**Website:   Front-end:** HTML5,CSS,AJAX,PHP                    **Back-end:** PHP,MYSQL,JAVASCRIPT
**APP:          Front-end:** Android  Studio, XML                  **Back-end:** Core Java, PHP
**Database + Hosting services:** MYSQL

**Dependencies/Show-Stopper:** The event created by company and as many as possible people in
Groups ,individual, others  join by advertising or something will be show-stopper for us .
One company or group or individual depend on others to join their event and conduct with huge amount
Of resources and man power at very large scale.
